## OSU 2025 FALL SEMESTER HONORS COURSES DRAFT 1 2/14/25 Sorted Alphabetically

Check back frequently, as there are more courses in the pipeline.

[Underlined courses may be used as part of the General Honors Award honors seminar/interdisciplinary honors course requirement. All HONR 1010,1020, 1030 are Seminar Courses]

[Italic Courses are Honors Add-ons and MUST be taken with the associated regular course.]

[Double underlined courses are designated students in specific activities, career paths, majors, scholar cohorts, or otherwise require a permit.

Verify with your advisor to see if a course is applicable to you]

Subject	Course Number	CRN	Credit Hours	Gen Ed Code	Course Title	Honors Area	Instructor	Meeting Times	Course Description	Additional Notes

ENGL	2000	60200		Stuff OSU Should Know: Podcasting OSU History and	Humanities	Wood	W1020 4420	This class is designed to provide you a platform for hands-on, collaborative application of the skillsets taught in the OSU Composition Program by engaging in the advancement of the podcast, Stuff OSU Should Know. In addition to providing a unique perspective on research methods, outlining, combining varieties of writing modes/genres, and addressing an audience, podcasting also creates opportunities to test or hone your ability to network, conduct interviews, survey an audience, and to develop marketing and outreach strategies. Students are welcome to produce new podcast content or to work in a more behind-the-scenes capacity, or some unique combination of the two, as with social media management.	Course Type - In Person This is an Honors Add-on Course you MUST also
ENGL	2890	69225	1	Mythology and Folklore in Graphic Novels: Honors	Humanities	Morse	R 0900-0950	released by mainstream publishers such as Marvel and DC; critically acclaimed series by writers such as Neil Gaiman, Mike Mignola, and Natasha Alterici; and excerpts from graphic novels that take inspiration from Greek, Norse, Irish, Russian, African, Egyptian, Chinese, Japanese, and Pacific Island lore. Students will and write critically about contemporary depictions of traditional characters, create their own storyline using elements adapted from myths and/or folktales, and submit papers that explain the choices involved in their own mythmaking process.	
								Many have argued that superhero stories are our modern myths. But what about the plots, characters, and interactions these stories import from older mythological and folkloric traditions? This course will examine the disparate-and often overlapping-uses of mythology and folklore from around the world in popular comics	
ENGL	2413	60767	3 DH	Exploring Literature: Honors (DH)	Humanities	Ross	MWF 0930-1020	Since the beginnings of recorded literature, people have been telling stories about supernatural beings, projecting our curiosities, fears, and desires onto vampires, zombies, giants, witches, werewolves, or ghosts. These imagined "others" allow us to explore the strangeness in ourselves, and find new ways to conceive of what it is to be human. In this course we will read and discuss a range of genres, including plays, novels, shorts stories, and poetry, all focused around the representation of the supernatural in literature, as a way of thinking about what we define as "natural."	Course Type - In Person
ENGL	2413	60766	3 DH	Exploring Literature: Honors (DH)	Humanities	Rogers	TR 1200-1315	Authors often set their stories in the Middle Ages, in order to show us something about our own culture. These compelling "medievalisms" use the seemingly far-away and exotic in order to reveal modern constructs of identity (race, class, gender, etc.). In this class, we will read from a wide range of literature—from the actual medieval through the various historical modes of medievalisms in fiction, poetry, and drama. Our class discussions and writing will interrogate how the medieval constructions of love, heroism, and the battle of the sexes become modes in modern literature that allow us to bolster, question, and challenge our own notions of self and community. The emphasis in this course will be on enabling you to read texts on your own, understand them, and write about the features in them that make them memorable. We will read poems, fiction, and plays that encompass a wide range of voices—voices from different times, places, cultures, and social standings. The course will place these voices into their literary and social contexts to help us seek out the enjoyment and meanings they gave their original readers. From that vantage point, we will look for our own connections to the texts, listening carefully for how they still speak to us.	Course Type - In Person
ENGL	2413	60765	3 DH	Exploring Literature: Honors (DH)	Humanities	Carter	TR 0900-1015	This course will focus on tracing the roots and branches of speculative fiction, and how social critique emerges as a core motivation driving this genre. We will look back in time to the nineteenth century, when this genre spread roots that grounded many of the forms recognized today, as authors responded to cultural upheavals from scientific discoveries, industrial pollution, imperialism, and evolving debates over race, class, and gender. We will also look forward in time to contemporary authors branching out these genre forms to grapple with ongoing legacies of these upheavals manifest in climate change, late-stage capitalism, and algorithmically heightened culture wars. Across time, these authors have evolved wide-ranging speculative fiction forms to imagine alternate realities, seeking to conjure the world otherwise in order to critique the world as it is. In this course, we will explore examples of nineteenth-century and contemporary speculative fiction and closely analyze how the various forms of this genre are developed and reimagined to facilitate social critique. The course aims to invite students to critically evaluate their own narratives and imaginings of potentialities within and beyond their current moment in history.	Course Type - In Person

HIST	3890	67619	1	History of Travel Honors: Americans and Europeans Overseas	Humanities	Schauer	W 1230-1320	This course will examine the history of modern travel through the study of American and British travelers in North America, Europe, Africa and Asia. We will examine the wide variety of reasons they traveled including tourism, exploration, migration, imperial expansion, adventure, military service, and immigration. We will read memoirs and journals, but also analyze art, music, and documentaries to see how these individuals reflected the history of their time. This class pairs with HIST1103, HIST1483, HIST1493, HIST1623, HIST1823, and HIST2023. HIST	3890	71063	1	Honors: Hamilton and the Public Memory of America's Founding		Kosc	R 1330-1420	This course will explore America's founding in both fact and popular memory through the lens of Lir Manuel Miranda's Broadway hit, Hamilton. America's founding has been interpreted and reinterpreted for countless audiences over the years with each new generation deriving different meaning from this formative period. The themes of immigration, slavery, women's rights, political violence, American work ethic, and presidential personalities will all be highlighted as we discuss what really happened in these founding years, how the past bears on the present, and how the present continues to shape how we view the past. At the end of the course, students will be asked to assess the merits of Miranda's Hamilton as art, history, and political statement. Adon for HIST 2023, History of the Present; HIST 1483, American History to 1865; HIST 1103, Survey of American History; HIST 4363 US History through the Lenses of Popular and Unpopular Music	Course Type - In Person This is an
<u>HIST</u>	3980	<u>69321</u>	<u>3</u>	Honors: Power and Protest in US History.	Humanities	Karibo	TR 1500-1615	There has been a renewed public debate over the role of political protest in society. Americans have grappled with difficult and important questions, such as: who has the right to protest and how? What does it mean to express dissent? How can we—both individually and collectively—mobilize to make political change in effective ways? In fact, these debates are not new in the U.S., but instead are deeply rooted in the American political tradition. This course traces the history of social movements from the late-19th century to the present. We will focus on two case studies, including the 'long Civil Rights Movement' and the battle for gender equality, examining the historical context that gave rise to these movement; the tactics that emerged within various factions of the movements; the philosophical debates they raised; and the response and reactions to them in the media, by the public, and by those in power.	Course Type - In Person This Course can be used to meet the Honors Seminar Requirement
HIST	3980	<u>70623</u>	3	Honors: Religion and Mythology	Humanities	Nash	TR 1200-1315	This course, specifically designed for honors students, uses myths from Mesopotamia, Egypt and Canaan from the third to the first millennia B.C. as a starting point for considering the fundamentals of ancient polytheistic religions in these regions. This course places religion and myth within a historica context. We will also read some prayers, letters to gods and treaties to see how religion permeated ancient life. The course is writing intensive: students must have passed Comp I to enroll.	Course Type - In Person This Course can be used to meet the Honors Seminar Requirement
<u>HONR</u>	<u>1010</u>	<u>70580</u>	3	They Wouldn't Put it on the Internet if It's Not True: Info. Literacy in Post-Truth Era	Social Sciences	Reiter	TR 1500-1615	This course provides an overview of essential concepts and skills needed for success in navigating an increasingly uncertain and perilous information landscape. Awareness of, access to, and quality of information have demonstrable impacts on social, economic, academic, and political well-being. This course will address issues of access, use, creation, and dissemination of information and how it affects particular populations of people, with an emphasis on historically marginalized and underrepresented groups. Students will learn to locate, access, use, evaluate, organize, create, and present information effectively for personal and academic research needs. Students will examine biases within each of those paying particular attention to issues of race, gender, class, sexuality, ethnicity, and other personal, political, and socioeconomic factors. Students will also improve their understanding of authority and trust, value of information, the nature of scholarly conversation, and the nature of inquiry and exploration.	Course Type - In Person This Course can be used to meet the Honors Seminar Requirement
HONR	1010	70581	1	Practical Law for the Modern Citizen: Honors	Social Sciences	Holmes	Т 0900-0950	The goal of this course is to give students an overview of the law. This is relevant for all citizens. It applies to social, legal, and career aspects of their lives. Finally, students will emerge from this class confident in their abilities, knowing that they have a better basis for meeting any challenge life or the law presents them. This survey will review excerpts from important ancient and historical texts which provided a basis for the foundation of American Law. In particular, there will be a focus on the Declaration of Independence, the Constitution, and the Bill of Rights. Furthermore, students will read representative examples of some of the most important speeches and legal arguments in American history.	Course Type - In Person This Course can be used to meet the Honors Seminar Requirement
HONR	1010	70582	2	Eloquent Persuasion for the 21st Century: Honors	Social Sciences	Holmes	TR 1030-1120	This course is designed to teach students of the Post-Internet Age how to communicate through oral presentation and speeches, to counter what is becoming the lost art of verbal communication. From the most informal and commonplace situations, to the most formal platforms on the national and international scale, this will give them a familiarity with the world's most significant speeches which shaped modern civilization. Reading those words will also bring historical figures to life. Building on that foundation, they will then prepare, write, and practice speaking in class. This will give them the confidence that only experience and detailed critiques will provide. It will show the power of precise writing, as Abraham Lincoln's Gettysburg Address, for example, demonstrated in only 272 words. All students will eventually give a prepared speech all some time in their lives, making this an invaluable tool.	Course Type - In Person This Course can

								2nd half will cover Darwinian Evolution and Mendelian Genetics. Literary and artistic works influencing or influenced by these scientific works will be covered immediately following the relevant scientific cases, so comparisons and contrasts in approach and justification can be highlighted. Examples of relevant work in the Humanities include Romantic Poetry, Frankenstein, works exploring "hereditary" traits (lbsen's Ghosts), scientific rationality and technology generally (Kafka), or specific scientific ideas (short stories by Borges,	Course Type - In Person This Course can be used to meet the Honors Seminar

HONR	1010	2 70583	2	Jury of 12: Past and Present: Honors	Social Sciences	Holmes	TR 1330-1420	This class will study the U.S. Constitutional basis for jury trials at the state and federal level. Students will learn the legal process of jury duty and selection, which begins at age 18. There will be a mandatory field trip in the beginning of the semester to the Payne County Courthouse in Stillwater. Presentations by a District Judge, the Court Clerk's Office, Sheriff's Office, District Attorney's Office, and a Defense Attorney will include their general duties, as well as specific information on the responsibilities, and what to expect, in jury duty—from selection to the end of a trial. During the semester, 12 of the most famous jury trials in American history will be studied. These will become the basis for a mock jury trial. Legal arguments based on the facts of the original cases, with students taking an active role in a simulated courtroom setting. They will then deliberate on a verdict, similar to a real case. A significant number of students serve on juries in Payne County, and this is useful preparation for an important duty that may be used now.

										Was there really a cow in the Old Central bell tower? How does the architecture on campus shape the gameday experience? What do statues, building names, and homecoming have to say to us today? Which traditions and legends ring true, which are simply myth, and who keeps them alive? Utilizing a Place-as-Text* curriculum developed and taught by honors colleges and programs around the country this course will focus on reading and exploring Oklahoma State University as a text. This course will focus on OSU and explore life and culture through immersive, experience-based activities. Through numerous campus excursions and field trips, students will learn to observe closely, "read" what they encounter and experience, and independently analyze how cultural ideas create the real living conditions at OSU. This course serves as an honors seminar	Course Type - In Person This Course can be used to meet the Honors Seminar

<u>HONR</u>	-	2073	<u>68671</u>	<u>3</u>	<u>DH</u>	The Story of Lizzie Borden: Axe Murder in American Culture (DH)	Humanities	Miller	TR 1030-1145	In 1892, Lizzie Borden was accused of killing her father and stepmother with an axe. She was eventually acquitted, but her story had captured the American cultural imagination. This course will take a chronological approach to the history of the Lizzie Borden story as it evolved from news reports contemporaneous to the case through broadsides and early true-crime takes to fictionalized versions in the form of short stories, plays, poems, a ballet, and a few films—among other genres. We will consider how changing concepts of gender shape the way in which the story gets told in different media and in different moments in American history. Ultimately, we will ask what it says about American culture that—for better or for worse—we just cannot let Lizzie go. STAT	2890	63793	1		Honors Experience in Statistics	STEM	Alford	M 1530-1620	Games of chance have been one of the historical drivers of mathematical probability since the 1654 series of letters between Pascal and Fermat. In the 21st century, applications of probability have moved beyond gambling into many different types of games. In this seminar, we examine various types of games of chance plus skill. Major assignments are a mathematical exam and a group poster project on some type of game.	Course Type - In Person This is an
