									This course combines studio and seminar components to teach drawing skills as a vehicle for heightened understanding of the physical world. Students will learn foundational techniques of observational drawing and will explore drawing's historical role in both scientific and humanities disciplines. Learning how to draw observationally is about paying close attention to one's surroundings, and the process of drawing can be both meditative and analytical. Through hands-or art projects, lectures, readings, field trips and group discussions, students will develop their own artistic voice and learn to use drawing as a vehicle for contemplation and innovation. Students will be encouraged to make interdisciplinary connections, and explore complex conceptual questions they develop the development between theme development development conceptual questions the strengther terminest between theme development development and the strengther terminest and terminest and the strengther terminest and the strengther terminest and the strengther terminest and terminest and terminest and terminest and terminest and the strengther terminest and termine	Course Type - In Person This Course can be used to meet the Honors

								This course will focus on tracing the roots and branches of speculative fiction, and how social	
								critique emerges as a core motivation driving this genre. We will look back in time to the nineteenth	
						1		century, when this genre spread roots that grounded many of the forms recognized today, as	
								authors responded to cultural upheavals from scientific discoveries, industrial pollution,	
								imperialism, and evolving debates over race, class, and gender. We will also look forward in time to	
								contemporary authors branching out these genre forms to grapple with ongoing legacies of these	
								upheavals manifest in climate change, late-stage capitalism, and algorithmically heightened	
								culture wars. Across time, these authors have evolved wide-ranging speculative fiction forms to	
								imagine alternate realities, seeking to conjure the world otherwise in order to critique the world as	
								it is. In this course, we will explore examples of nineteenth-century and contemporary speculative	
								fiction and closely analyze how the various forms of this genre are developed and reimagined to	
								facilitate social critique. The course aims to invite students to critically evaluate their own	
ENGL	2413	60765	3 DH	Exploring Literature: Honors (DH)	Humanities	Carter	TR 0900-1015	narratives and imaginings of potentialities within and beyond their current moment in history.	Course Type - In Person
	-								
								Authors often set their stories in the Middle Ages, in order to show us compating shout our own	
								Authors often set their stories in the Middle Ages, in order to show us something about our own	
								culture. These compelling "medievalisms" use the seemingly far-away and exotic in order to reveal	
								modern constructs of identity (race, class, gender, etc.). In this class, we will read from a wide	
								range of literature—from the actual medieval through the various historical modes of medievalisms	
								in fiction, poetry, and drama. Our class discussions and writing will interrogate how the medieval	
								constructions of love, heroism, and the battle of the sexes become modes in modern literature that	
								allow us to bolster, question, and challenge our own notions of self and community.	
								The emphasis in this course will be on enabling you to read texts on your own, understand them,	
								and write about the features in them that make them memorable. We will read poems, fiction, and	
								plays that encompass a wide range of voices—voices from different times, places, cultures, and	
								social standings. The course will place these voices into their literary and social contexts to help us	
								seek out the enjoyment and meanings they gave their original readers. From that vantage point, we	
								will look for our own connections to the texts, listening carefully for how they still speak to us.

This weekly course will pair with the Introduction to Physical Geography course and will go into more detail about the physical geography its influence on US Society. Primarily, the course will discuss the physical geography of the US National Parks and encourage interest and engagement with the National Park Service. The course will focus on how physical geography has shaped the landscape of the US and defined its National Parks and federal Iands. Physical geography news and events and how they are portrayed in the media will also be considered. A large amount of the various resources used by human society have their origin in geologic events and processes. This course will aim to provide a more in-depth introduction to key resources alongside GEOI 1114. The resources to be covered will include energy, minerals, rocks and those necessary for life. Specific resources that may be covered include groundwater, surface water, soil, building materials, metals - precious, base and technology specific, renewable energy and fossil fuels. Currently, the relative importance of different resources is changing, and understanding their origin is important to investigating these changes. Examples include the decline in coal production related to an increase in gas and renewable energy resources, as well the changing need for different metals to support the development of technologies. This course will explore the validity of arguments and/or conclusions in dinosaur research through evaluating the scientific evidence. Students will read, experiment, and evaluate scientific literature surrounding dinosaurs. They will work with others to assess t	Honors Add-on Course you MUST also take GEOG 1113 ANY Course Type - This is an Honors Add- on Course you MUST also take GEOG 1114 ANY Course Type - This is an Honors Add- on Course you MUST also take GEOL 1114 ANY GEOL 1014 Course Type - This is an Honors Add-

								This is one-hour Honors Add-On discussion course that introduces students to issues of sustainability related to drought and global warming, hydro-and geothermal power, groundwater resources, melting of polar ice and sea level rise, as well as human response to climate change.Topics covered in this course include exploration and discussion of four areas in geology related to the action of water: • Rivers: Erosion by water – issues of drought and global warming, water use by humans• Caves: Water in underground spaces – groundwater resources, use of caves by early cultures • Ceyesr: Action of water - melting of polar glaciers, sea-level rise and climate changeThe science of each topic is discussed, including famous examples from around the world, and how human actions impact each of these fragile ecosystems and influence biodiversity. The course includes regular short reports of class discussions and a final 3- page paper about one topic which influenced the student's understanding of the power of water. Although there is no textbook, each week there are You-tube video links and other online information (posted in Canvas) to	Course Type - In Person This is an Honors Add-on Course you MUST

HIST	3890	67619	1	History of Travel Honors: Americans and Europeans Overseas	Humanities	Schauer	W 1230-1320	This course will examine the history of modern travel through the study of American and British travelers in North America, Europe, Africa and Asia. We will examine the wide variety of reasons they traveled including tourism, exploration, migration, imperial expansion, adventure, military service, and immigration. We will read memoirs and journals, but also analyze art, music, and documentaries to see how these individuals reflected the history of their time. This class pairs with HIST103, HIST1483, HIST1493, HIST1623, HIST1823, and HIST2023. HIST	3890	71063	1	Honors: Hamilton and the Public Memory of America's Founding	Humanities	Kosc	R 1330-1420	This course will explore America's founding in both fact and popular memory through the lens of Lir Manuel Miranda's Broadway hit, Hamilton. America's founding has been interpreted and reinterpreted for countless audiences over the years with each new generation deriving different meaning from this formative period. The themes of immigration, slavery, women's rights, political violence, American work ethic, and presidential personalities will all be highlighted as we discuss what really happened in these founding years, how the past bears on the present, and how the present continues to shape how we view the past. At the end of the course, students will be asked to assess the merits of Miranda's Hamilton as art, history, and political statement. Add-on for HIST 2023, History of the Present; HIST 1483, American History to 1865; HIST 1103, Survey of American History; HIST 4363 US History through the Lenses of Popular and Unpopular Music	Course Type - In Person This is an Honors Add-on Course you MUST also take HIST 2023 HIST 1483 HIST 1103 HIST 4363
HIST	3890	71156	1	Honors: History Lessons with Taylor Swift	Humanities	Arata	W 1430-1520	This course will delve into the intersections of history, storytelling, and popular culture through the music of Taylor Swift. Arguably the most recognizable recording artist of the twenty-first century, Taylor Swift has unquestionably mastered the delicate artform of speaking to historical subjects through modern storytelling. Her lyrics often reference eras, events and historical figures in a surprising amount of context. The eras of the Victorian era, the Gilded Age, and the Roaring Twenties emerge in songs that simultaneously capture the identity of Swift as a songwriter in the present. Societal representations of women and the complicated struggles for women's equality are captured in multiple ways. Historical personas such as starlet Clara Bow, through whom it is possible to contextualize the silent film revolution of the early 20th century, and divorcee-heiress Rebekah Harkness, who exposes mid-century social expectations, come back to life in lyrics. Throughout the course, students will examine both the "real" historical moments and context that Swift references, and engage in critical analysis of the ways they are related through her lyrics. At the end of the course, students will assess the merits of learning history through song. Add-on for HIST 1103, Survey American History; HIST 1483, American History to 1865; HIST 1493, American History since 1865; HIST 2023, History of the Present; HIST 4363, US History through the Lenses of Popular and Unpopular Music. 									There has been a renewed public debate over the role of political protest in society. Americans	
									have grappled with difficult and important questions, such as: who has the right to protest and	
									how? What does it mean to express dissent? How can we—both individually and	
									collectively-mobilize to make political change in effective ways? In fact, these debates are not	
									new in the U.S., but instead are deeply rooted in the American political tradition. This course traces	
									the history of social movements from the late-19th century to the present. We will focus on two	
									case studies, including the 'long Civil Rights Movement' and the battle for gender equality,	
									examining the historical context that gave rise to these movements; the tactics that emerged within	Course Type - In Person This Course
									various factions of the movements; the philosophical debates they raised; and the response and	can be used to meet the Honors

All students will eventually give a prepared speech at some time in their lives, making this an invaluable tool. This class will study the U.S. Constitutional basis for jury trials at the state and federal level. Students will learn the legal process of jury duty and selection, which begins at age 18. There will be a mandatory field trip in the beginning of the semester to the Payne County Courthouse in Stillwater. Presentations by a District Judge, the Court Clerk's Office, Sheriff's Office, District Attorney's Office, and a Defense Attorney will include their general duties, as well as specific information on the responsibilities, and what to expect, in jury duty—from selection to the end of a trial. During the semester, 12 of the most famous jury trials in American history will be studied. These will become the basis for a mock jury trial. Legal arguments based on the facts of the original cases, with students taking an active role in a simulated courtroom setting. They will then deliberate on a verdict, similar to a real case. A significant number of students serve on juries in Payne County, and this is useful preparation for an important duty that may be used now. The goal of HONR 1010, International Trade: A Survey of Global Markets from the Slik Road to USMECA is to introduce students to the history and contemporary international trade issues. HONR	<u>1030</u>	70622	2 3	Bad Arguments: How to Recognize Them and Respond with Critical Thinking (Honors)	Humanities	Frohock	TR 1330-1445	This course focuses on how to recognize and analyze bad arguments. We will study types of rhetorical fallacies, faulty reasoning, and bad faith persuasion, looking for real world examples in public discourse, advertising, and social media. By studying bad arguments, we will work to define a methodology for sound critical thinking, which is fundamental to all academic discourse. To put it another way, learning objectives for the course are understanding how to avoid being manipulated by, and how to be empowered to respond to, faulty arguments. HONR	<u>1030</u>	70924	1 3	Coming in from the cold: espionage in fiction and film	Humanities	Hearn	MWF 1030-1120	This course will consider the development of the espionage plot in fiction and film from the beginning of the twentieth century to the present with particular emphasis on the figure of the spy. Authors may include Joseph Conrad, John Buchan, John Le Carré, Eric Ambler, and Graham Greene. Films may include titles by Alfred Hitchcock as well as adaptations of the work of Frederick Forsythe, Tom Clancy, and Ian Fleming. Students' mission, should they choose to accept it, may include the creation of an undercover identity.	Course Type - In Person This Course can be used to meet the Honors Seminar Requirement
HONR	1030	71152	2 3	The National Parks and American Nature Writing: Honors	Humanities	Slesinger	TR 1200-1315	The landscape of the American continent has shaped the cultural imaginations of all who have lived here: a trend that began with the original, indigenous inhabitants of the land and extends into the diverse populations of America today. This class will survey the stories told by American people about their land with two main emphases: first, an eye towards the plurality that is emblematic of American discourse, and also the overarching reverence for the land that has spawned various conservation efforts including the creation of the National Park System. When Yellowstone National Park was designated in 1872, it became the world's first national park, and marked a watershed moment in the relationship of the people to the land. But, others have suggested that it's not just the beautiful places that deserve to be protected. We will approach a variety of perspectives on American wilderness, national parks, conservation, and accessibility through numerous media in this course to provide an overview of the way this conversation is entrenched in the American cultural psyche in all its diversity. HONR	2003	68671	<u>зрн</u>	The Story of Lizzie Borden: Axe Murder in American.	Humanities	Miller	TR 1030-1145	In 1892, Lizzie Borden was accused of killing her father and stepmother with an axe. She was eventually acquitted, but her story had captured the American cultural imagination. This course will take a chronological approach to the history of the Lizzie Borden story as it evolved from news reports contemporaneous to the case through broadsides and early true-crime takes to fictionalized versions in the form of short stories, plays, poems, a ballet, and a few films—among other genres. We will consider how changing concepts of gender shape the way in which the story gets told in different media and in different moments in American history. Ultimately, we will ask what it says about American culture that—for better or for worse—we just cannot let Lizzie go.	
HONR	2093	<u>68670</u>	2 3 Н	Tornadoes in American Culture (H)	Humanities	Miller	TR 1200-1315	This honors seminar will explore how tornadoes shape regional identities, produce diverse narratives, and influence art, literature, and film. 									This Honors Add-on is designed for students from MATH 2144 (Calculus 1(A)) who are interested in	
									exploring the applications of calculus in the life sciences. Throughout the course, we will study	
									functions and their limits, derivatives, and integrals in the context of real-world problems in fields	
									such as population dynamics, epidemiology, and cellular biology. By the end of the course, students will have gained a deeper understanding of how calculus can be used as a powerful tool	Course Type - In Person This is an
									for modeling and analyzing biological systems. Students will also have the opportunity to apply the	Honors Add-on Course you MUST

PSYC	2890	63335	1		Antihero: Themes of personality and psychopathology in Taylor Swift's catalog Honors	Social Sciences	Sweatt	M 1330-1420	Students in this course will explore themes of personality and psychopathology stitched within the labyrinth of Swift's lyrics. Through the lens of the latest psychological research, students will learn about constructs such as narcissism, melancholia, Machiavellianism, and borderline personality traits. By examining how these constructs manifest in her storytelling, students will gain deeper clarity in psychopathology and its nuanced portrayal in popular culture. Students who enroll should have at least basic knowledge of and appreciation for Taylor Swift's music.
