AGEC	2990	21966	1		Deep Issues of Agricultural Economics: Honors	Social Sciences	Norwood	R 1500-1550	Deeper Analysis of AGEC Issues: Honors - Discussion of selected agricultural and rural issues related to agricultural family finances, agribusiness planning, consumer behavior, agribusiness start-ups, current agricultural news topics, and history of economic thought.	Course Type - This is an Honors Add-on Course you MUST also take AGEC 1113 ANY
ANSI	4900	20019	1		Principles of Nutrilion: Honors	STEM	Carter	F 1530-1620		Course Type - In Person This is an Honors Add-on Course you MUST also take ANSI 3543 ANY
ANSI	4900	22397	1		Retail and Food Service Meat Value: Honors	STEM	Pfeiffer	T 0900-0950		Course Type - In person This is an Honors Add-on Course you MUST also take ANSI 2233 or ANSI 2253
ANSI	4900	22667	1		The Role of Assisted Reproductive Technologies (ART) in Animal Agriculture: Honors	STEM	Stein	F1230-1320	Various Assisted Reproductive Technologies have been developed to obtain a large number of offspring from genetically superior animals or obtain offspring from infertile animals to increase herd quality in a shorter period of time than traditional breeding methods. These technologies include artificial insemination, embryo transfer, embryo splitting, cryopreservation/vitrification (freezing) of embryos, ocytes, and semen, in vitro fertilization (IVF), intracytoplasmic sperm injection (ICSI), sexed semen, determination of the sex of embryos, and somatic cell nuclear transfer (cloning) and the ability to engineer transgenic animals. The creation of transgenic livestock is one of the most groundbreaking, yet controversial technologies emerging in agriculture today. The curretnly available and emerging Assisted Reproductive Technologies will offer opportunities for improvements in genetic selection and will be crucial in meeting the global challenges facing animal agriculture created by the anticipated increase in the world population by 2050 requiring an estimated 50% increase in 60 production. Advocates of some of these Assisted Reproductive Technologies will likely face opposition by the general public who lack understanding and acceptance of these reproductive tools for increased animal production and performance. This Honors add-on section will explore the science behind, and the different perspectives of the available and emerging Assisted Reproductive Technologies in animal agriculture.	Course Type - In Person This is an Honors Add-on Course you MUST also take ANSI 3444 ANY
ARCH	2890	24138	1		Honors Add-on for ARCH 1216 Studio	STEM	Brown	T1330-1445		Course Type - In Person This is an Honors Add-on Course you MUST also take ARCH 1216 ANY
ARCH	2890	27490	1		Honors Add-on for ARCH H/T II	STEM	Rabens	T1500-1615	This course will provide an in-depth examination of the life and work of Frank Lloyd Wright, one of the pre- eminent architects of all time. During a career that spanned 70 years, Wright designed over 1,000 structures and built more than 400 of them. He especially made his mark in the field of domestic architecture in the form of the single-family detached house. Wright's name is practically synonymous with architecture itself in the eyes of the general public; but his life and work were not without controversy. We shall endeavor to separate fact from fiction wherever possible in our investigations.	Course Type - In Person This is an
ARI	1103	20049	3		Drawing I Honors		Sommer	TR 0900-1150	This course combines studio and seminar components to teach drawing skills as a vehicle for heightened understanding of the physical world. Students will learn foundational techniques of observational drawing and will explore drawing's historical role in both scientific and humanities disciplines. Learning how to draw observationally is about paying close attention to one's surroundings, and the process of drawing can be both meditative and analytical. Through hands-on art projects, lectures, readings, field trips and group discussions, students will develop their own artistic voice and learn to use drawing as a vehicle for contemplation and innovation. Students will be encouraged to make interdisciplinary connections, and explore complex conceptual questions throughout the drawing process. No previous drawing experience required.	Course Type - This Course can be used to meet the Honors Seminar Requirement
BIOL	2890	22867	1		Using Nutritional Ecology to Link Physiology, Behavior, & Ecology: Honors	STEM	Wilder	W 1030-1120	The goal of this course is to provide an overview of the topics studied in nutritional ecology and their relevance to different fields of biology The field of nutritional ecology was developed to aid in understanding the complex interactions between macronutrients in animal diets and their consequences for health and filtness. This work integrates several fields of biology including: physiology (What are the biochemical pathways through which nutrients affect animals?), behavior (How do animals choose among foods to regulate their diet?), and ecology (What are the consequences of diet for populations, communities and ecosystems?).	Course Type - In Person This is an Honors Add-on Course you MUST also take BIOL 1113 ANY

				<u></u>				<u></u>	
BIOL	3890	22836	1	Physiology: Honors	STEM	Minghetti	M 1430-1520	Controversies in Physiology - We will use a seminar format to explore areas of controversy within physiology and physiology-related sciences. Selected topics will be in-depth explorations of material that is (usually) briefly touched upon in class, giving you the opportunity to advance your understanding of physiology beyond what we have time to consider in the main course. As the seminar title indicates, our topics will be those for which there is some controversy, e.g., because the science is emerging or very complex, because ethical questions arise as a result of the science, and/or because segments of society have difficulty accepting the science. Course meetings will be a combination of professor-led and student-led discussions over topics for which the materials have been given to everyone for review ahead of time in order to come to the class prepared.	Course Type - This is an Honors Add-on Course you MUST also take BIOL 3204 ANY

4400	20589	1		Honors Insects and Society	STEM	Hoback	R1500-1550	Insects and Society examines the role insects have played in human lives historically and in the present day. Insects contribute more than \$50 billion dollars to the U.S. economy and they kill more than one million people worldwide every year. For the fall Honors option, we will read and discuss Locust by Jeff Lockwood. The Rocky Mountain migratory locust was the most abundant animal on the planet and caused great hardships until the early 1900s as the western United States was settled. Today, it is extinct. This book examines the impact of the locust on the American west and reasons for its unintended extinction. Students will investigate the roles of biodiversity, ecology, and human disturbance in shaping our world in the past, present, in order to consider the future. HONR	1010	28324	3	Put it on the Internet if it's Not True: Information Literacy in. Post-Truth Era: Honors	Social Sciences	Rosser	TR 1330-1445	This course provides an overview of essential concepts and skills needed for success in navigating an increasingly uncertain and perilous information landscape. Awareness of, access to, and quality of information have demonstrable impacts on social, economic, academic, and political welt-being. This course will address issues of access, use, creation, and dissemination of information and how it affects particular populations of people, with an emphasis on historically marginalized and underrepresented groups. Students will learn to locate, access, use, evaluate, organize, create, and present information effectively for personal and academic research needs. Students will examine biases within each of those paying particular attention to issues of race, gender, class, sexuality, ethnicity, and other personal, political, and socioeconomic factors. Students will also improve their understanding of authority and trust, value of information, the nature of scholarly conversation, and the nature of inquiry and exploration.	Course Type - In person This Course can be used to meet the Honors Seminar Requirement
uous.		00000		Investing Your Edward Magaza		Collins	T4000 4700	This one-hour seminar introduces students to scholarships, fellowships, research programs, international study, and other unique opportunities at OSU and beyond. Students receive guidance and develop skills needed to prepare competitive applications including writing personal statements, giving presentations/interviewing, and building relationships with academic and professional mentors. In addition to participating in lively class discussion, students will interact with former nominees and recipients of national awards as well as campus advisors for each program. This course presents students with exciting opportunities that prepare them for the future, whether they are applying for prestigious scholarships,	Course Type - In Person This Course can be used to meet the Honors Seminar Requirement
HONB	1010	28325 28327	1	Inventing Your Future: Honors Principled Negotiation for Everyone: Honors	Social Sciences Social Sciences	Sultins	T 1630-1720	seeking admission to top graduate schools, or pursuing highly competitive professional positions. The goal of this course is to learn how to negotiate. This is intended for students of all backgrounds and career fields The textbook will be "Getting to Yes: Negotiating Agreement Without Giving In", Second Edition, 163 pages, written by Roger Fisher, William Ury, and Bruce Patton, all at the Harvard Negotiation Project. It teaches principled negotiation methods universally applicable to personal and professional disputes, whether involving: "parents and children, neighbors, bosses and employees, customers or corporations, tenants or diplomats". The course will include lectures with discussion and short papers on the book, and then move to actual negotiations in class by the students based on common situations. 	A1444			Eloquent Persuasion for the 21st Century, Honors		Tionics .		This course is designed to teach students of the Post-Internet Age how to communicate through oral presentation and speeches, to counter what is becoming the lost and of werbal communication. From the most informal and commonplace situations, to the most formal platforms on the national and international scale, this will give them a familiarity with the world's most significant speeches which shaped modern civilization. Reading those words will also bring historical figures to life. Building on that foundation, they will then prepare, write, and practice speaking in class. This will give them the confidence that only experience and detailed critiques will provide. It will show the power of precise writing, as Abraham Lincoln's Gettysburg Address, for example, demonstrated in only 272 words. All students will eventually give a prepared speech at	Course Type - In Persoon This Course
HONR	1010	28328 28342	1	Practical Law for the Modern Citizen: Honors	Social Sciences Social Sciences	Holmes	TR 1200-1250	The goal of this course is to give students an overview of the law. This is relevant for all citizens. It applies to social, legal, and career aspects of their lives. Finally, students will emerge from this class confident in their abilities, knowing that they have a better basis for meeting any challenge life or the law presents them. This survey will review excerpts from important ancient and historical texts which provided a basis for the foundation of American Law. In particular, there will be a focus on the Declaration of Independence, the Constitution, and the Bill of Rights. Furthermore, students will read representative examples of some of the most important speeches and legal arguments in American history.	Course Type - In Person This Course can be used to meet the Honors Seminar Requirement
HONR	1010	29336	3	Cults and Society; Honors	Social Sciences	Thomas	Web	What is a cult and why would someone become a member? From a sociological and social psychological perspective, this course will examine theoretical constructs based on empirical observation to answer these questions. By exploring the criteria for what constitutes a cult, common typologies, dynamics of charismatic leadership, the social context in which these groups formed their core beliefs, and the group processes that kedership, the members are suffered to the course will prepare students to critically analyze related social phenomena and make informed and reasoned decisions as citizens of a diverse society. Specific groups covered are The Peoples Temple, Charles Manson and the Family, Heaven's Gate, The Family International (Children of God), FLDS, Branch Davidians, Rajneeshees, NXIVM, and Scientology. HONB	<u> 1010</u>	<u>30385</u>	3		Mapping Mental lliness: Honors	Social Sciences	Thomas	MWF 1030-11:20	In order to address the growing concern for mental health, future leaders must recognize the social influences of mental illness. From a sociological perspective, this course critically examines the social production of mental illness and the social causes of mental illness across time and place. By investigating the distribution of mental illness according to race, ethnicity, class, gender, sexual orientation, religion, and ability, students will explore the ways in which modern understandings of mental illness have been shaped by historical social forces and broader systems of power that produce and reproduce inequality. HONR	1020	28320	1		Exploring the Medical Profession through an Osteopathic Perspective (Honors)	STEM	Wells	M 1230-1320	This seminar will provide an overview of specialties within the practice of medicine presented by clinical faculty from OSU College of Osteopathic Medicine. The seminar will broaden students' understanding of the medical profession, explain how osteopathic medicine is used to treat patients, and share how OSU Center for Health Sciences is creating pathways for students to practice medicine in rural and underserved communities. This class is suitable for any student interested in pursuing a career in medicine. If you are interested in a permit, email honors@okstate.edu. Permits will only be issued to students intending on attending medical school.	Course Type - In Person This Course can be used to meet the Honors Seminar Requirement
					Research as a Foreign Language for Future Health.				This seminar will provide students an opportunity to begin to read, understand, and speak the foreign language of research. We will, together, read 2-3 research articles related to current nutrition and health hot topics and thoroughly dissect each section. We will cover things like: what is an abstract and how do you use it properly, what are the sections of an introduction, what information can be pulled out of an introduction, what resource gold mine lies hidden in the introduction, what does a good purpose statement include, what is the dependent variable and how do you know, etc.? This class will use nutrition and health hot topic research articles to teach lessons, but lessons will be applicable to anyone interested in research or in a field	Course Type - In Person This Course can be used to meet the Honors Seminar
HONR	<u>1020</u>	<u>28334</u>	1		Professionals: Honors	STEM	Joyce	M 1430-1520	Not only for science majors, this course explores the role and promise of citizen science for society and the environment. In Unit 1, you will become a citizen scientist through hands-on experiences with environmental monitoring and methods. In Unit 2, you will work in teams to promote public participation in Citizen Science	
HONR	<u>1020</u>	28883	3		Citizen Science Campus: Honors	STEM	Colston	TR 1330-1445	Month in April, including a film festival, free water quality screening, and local bioblitz challenge.	Requirement
HONR	<u>1020</u>	29026	3		Biology and Movies: Honors	STEM	Garbutt	M 1845-2130	This course will examine biological ideas in science fiction novels, short stories, and movies. We will look at the underlying biology and how our current knowledge of biological systems helps us understand the implications of a range of common science fiction scenarios. Some authors currently under consideration include - Steven Barnes, Octavia Butler, Harry Harrison, Mur Lafferty, Bruce Sterling, Kurt Vonnegut, H.G. Wells, John Wyndham, and more.	Course Type - In Person This Course can be used to meet the Honors Seminar Requirement
HONR	1020	30313	3		Teaching Environmental Science Through Service: Honors	STEM	Colston	W 1530-1815	Learn science by teaching it! Students explore the natural world through outdoor activities, community service, and real teaching experience. You'll train in nationally recognized environmental education programs like Project WILD, WET, and Learning Tree, then bring science to life for kids in afterschool clubs and local events. Perfect for future educators, environmental scientists, and anyone who loves sharing their curiosity for the outdoors.	Course Type - In Person This Course can be used to meet the Honors Seminar Requirement
HONR	1030	28331	3		Let's Get Creative: Odyssey of the Mind (Honors)	Humanities	Andrews	MW 1600-1715	What is creative genius? Does it strike like lighting or build like a storm? Are creative geniuses blessed by the muses or are they simply working with the right materials, at the right time? This course interrogates the myth of creative genius by critically unpacking holding in the solving current Odyssey of the Mind (OotH) problems. By critically unpacking biographies, narratives and historical mythos that cloud the invention process, students will gain hands-on experience identifying, developing, and employing their own personal artistic and scientific processes for solving unconventional problems. Students will work as teams to solve a long-term Odyssey of the Mind problem and compete at the Oklahoma State Odyssey of the Mind competion held on Saturday, March 25th @ OSU, with the possibility of competing at the world finals at the end of May.

HONR	3023	<u>30307</u>	<u>3</u> GH	Contemporary Cultures of the Western World in Mexico. (GH)	Humanities	Andrews	W 12:30-1320 and travel during spring break	In this three-credit hour course (Led by Dr. John Andrews) we will explore the rich culture of Central Mexico through reading, discussion, and international travel. This class will use a City-As-Text Curriculum, which means the contemporary culture of Central Mexico (specifically Puebla, Mexico City, and La Preciosita) will be our object of study and will emphasize experiential learning and reflective writing. We will explore contemporary life in Central Mexico through reading, discussion of topics including modernization and cultural identity formation, and numerous excursions and activities aimed at developing interdisciplinary understanding. There are no prerequisites, and the class is open to all majors.	Course Type - This Course can be used to meet the Honors Seminar Requirement
HONR	3053	<u> 20775</u>	3 <u>DH</u>	Biology, Race, and Gender: Honors (DH)	Humanities	Recker	MWF 1330-1420	Biology, Race, and Gender - Critical interdisciplinary investigation of relationships between biological theory (especially Darwinism) and social and ethical issues. Attention to views of alleged biological aspects of perceived racial and gender differences and attempts to implement these views socially, legally, and medically in the United States and elsewhere. This class is designed for upper class students and restricted to those with Junior standing or above - you should be in your third or fourth year in Honors to take it.	Course Type - In Person This Course can be used to meet the Honors Seminar Requirement
HONR	2063	25930	3 H	Honors Jane Austen; Life, Art, and Influence (H)	Humanities	Jones	MWF 1130-1220	An author who continues to speak to generations of readers centuries after her death, Jane Austen wrote a half dozen novels that became classics within a few decades of their creation. This course examines the distinct features of the writing that accounts for her significant accomplishments - not just on the development of the novel but her influence on those novelts who followed her.	Course Type - In Person This Course can be used to meet the Honors Seminar Requirement
матн	2890	27230	1	Honors Contract Bridge II	STEM	Mermin	M1600-1715	In this course we will review the basics of bidding and play from Contract Bridge I and then go on to study additional techniques for all three areas of the game: bidding, declarer play, and defense. Our goal is to communicate more effectively with our partner through the language of bidding, and to become more skilled at winning tricks, to become a better declarer and defender. Advanced bidding techniques will include preemptive bidding for weak hands, slam bidding for strong hands, and modern tools like transfer bids in no trump auctions. Advanced play techniques include more work on the techniques of promotion, establishing long suits, and the finesse, and additional work on eliminating losers, managing entries, and keeping track of what's been played. We'll also work on signaling techniques through discards that can be used by defenders We may take a field trip to a tournament in OKC or Tulsai If there is sufficient interest.	Course Type - This is an Honors Add-on Course you MUST also take MATH 2144+ ANY
матн	2890	29084	1	Contract Bridge I: Honors	STEM	Mermin	W 1600-1715	In this course we will learn the basics of playing the game Contract Bridge, one of the most interesting and difficult games of strategy in the world. Students will learn the rules of the two phases of the game: the auction, or the bidding phase, and then the play of the cards. Students will learn to analyze card positions and think strategically. This involves mental counting of cards that have been played, and drawing inferences from the bidding and play of what cards opponents are likely to hold. We will touch on permutations and combinations, as they help us determine the number of options for ways the cards can be distributed, and then use basic probability to determine the most likely outcomes. The game also has social and information-theoretic aspects, requiring respectful and accurate communication with fellow players using the abstract language of bidding.	Course Type - This is an Honors Add-on Course you MUST also take MATH 2144+ ANY
матн	2890	29085	1	Counting and decision-making: Honors	STEM	Dosev	F 1230-1320	The course will cover various topics from the fields of combinatorics. We will study various counting techniques and use them to answer questions about probability. This is helpful in making business decisions, or when playing poker, when there is some uncertainty about what will happen. Topics include the sum and product rules, combinations and permutations, binomial coefficients, the principle of inclusion and exclusion, generating functions, and others as time allows.	Course Type - This is an Honors Add- on Course you MUST also take MATH 2144+ ANY
матн	2890	29086	1	Math and Origami: Honors	STEM	Mantini	√ 1500-1615	In this course, we will use the art of paper folding to create three-dimensional models that will help us investigate some of the advanced mathematics we are learning in courses at the level of MATH 2153 and above. Class sessions will consist of folding activities to create mathematical objects using different styles of origami, and additional mathematical analysis of the models we create. Some sample activities, and the courses and topics they might relate to, are:* Matrix models of flat vertex folds (Linear Algebra) * Using origami to trisect and angle (History of Math) * Modular Menger sponge (Fractals) * Origami helix (Calculus III or Vector Calculus) * Origami buckyball (Combinatorics) The class will do most folding projects in common but individually. Class requirements will be a series of smaller models done almost weekly and a final targer origami project and final presentation. Interested students might watch the PBS video from the science show Nova called The Origami Revolution (https://www.thirteen.org/programs/nova/nova-origami-revolution-episode/). No prior experience with origami is necessary; however, students with dexterity issues may experience some difficulties with this course.

								Overall course objective and philosophy: This course is the Honors section for MICR2123, Introduction to Microbiology. This year I have taken what I have learned from previous versions of this course to design a	
								course that will be maximally helpful in preparing you for laboratory research and your future careers. The	
								course has 4 principal components:1)Eaboratory math bootcamp: here we practice the algebra and arithmetic that are used every day in research labs. We will learn common unit conversions, solution	
								preparation, concentrations, fast mental math, and estimation. The goal is for students to be well-practiced	
								in everyday laboratory math and to project skill and intelligence to future professors and	
								employers.2) Central dogma bootcamp: a common comment I hear from students is that multiple courses at OSU cover the central dogma of molecular biology (replication, transcription, and translation), but that	
								none goes into more detail than in my MICR 2123 class. Here we will cover in detail the proteins and steps of	
								these molecular processes, with the goal that students will gain an enduring knowledge of how these processes work.3) Suided reading of the primary literature: here we will look at example scientific papers	
								and practice identifying the experimental logic, questions approached, the point of each experiment, the	
								experimental methods, and the interpretation of each figure. 4)Student presentations about historical	
								figures in science: here, students will prepare and deliver to the rest of the class 8-minute presentations about important historical figures in science to the rest of the class. I will provide a list of some potential	Course Type - In Person This is an Honors Add-on Course you MUST also

SPCH	2890	22666	1	Honors Experience in Speech	Social Sciences	Hanrahan	W 1230-1320	The practical and theoretical examination of the process of human communication involving a variety of contexts, including interpersonal relationships, small group discussions, and public speaking performances. This supplemental honor's course is designed to help you prepare for career success by developing competence in an area employers consider crucial to employment andadvancement: oral and written communication skills. This course will use theoretical constructs based on empirical observations to explain human communication the behavior in society in a variety of contexts and to use as the basis for creating sound oral presentations. For example, you will examine theoretical suggestions for organizing, writing, and delivering communication to different audiences in different environments, such as academic, business, and personal settings. Such theories will include the attributiontheory, social judgement theory, social penetration theory, and cognitive dissonance. Through this course, you will use critical thinking to explore, analyze, and critique communication theoretical structures in society. As a participant in this course, youwill demonstrate understanding of communication concepts through written and oral assignments, such as public speaking co-facilitation, speech night presentation, elevator pitch and self and peer evaluations. The application of theoretical constructs will be expected. Key areas of focus include confidence building, speech construction, speech delivery, and effective listening skills.
